

GAURAV DABRAL

Address: New Delhi, India | **Phone:** +91 7817843214 | **Email:** gauravdabral201@gmail.com

PROFESSIONAL SUMMARY

Enthusiastic Game Developer with 2.5 years of experience, skilled in gameplay development, prototyping, and game systems. A quick learner who thrives in fast-paced environments, manages multiple tasks effectively, and collaborates well with cross-functional teams and clients to deliver quality results.

SKILLS

- Converting clients’ requirements into technical specifications and achievable development milestones.
- Developing multiplayer gameplay mechanics using both unreal blueprint scripting and C++ in accordance with the requirements.
- Creating character locomotion for VR Interaction using unreal engine blueprints and C++.
- Creating game specific modular sub-systems such as damage, weapon inventory system etc.
- Creating Physics based interactions like physical animations, physics-based hit reactions, ragdolling etc.
- Playtesting, bug-fixing and re-iterating game mechanics according to client’s specifications.

TECHNICAL ARSENAL

Languages	C/C++
Game Engines	Unreal Engine 4/5
Development Tools	Visual Studio, VS Code, Mixamo, Figma
Version Control	Git, Github, Tortoise SVN

WORK EXPERIENCE (2.5 Years)

May 2025 to Present

Game Developer | UE C++

Logic Simplified Pvt. Ltd, Dehradun

Feb 2024 to April 2025

Game Developer | UE VR

Sunovatech India Pvt. Ltd, New Delhi

KEY PROJECTS

1. **Client IP** : Multiplayer Space Exploration Demo (Unreal Engine 5) - Contributed to a multiplayer space exploration game by implementing replicated 6DoF spaceship movement, gravity-aware AI, objective management, and a networked shooting system. Integrated backend APIs for persistent player data and gameplay progression while developing UI updates and gameplay systems within a listen-server multiplayer architecture.

Technology Environment : Unreal Engine 5.3, git.

2. **In-House IP** : Slot Game (Phaser 3) – Developed a slot game using **Phaser 3** and **TypeScript**, building gameplay features, responsive UI, and modular frontend systems. Integrated backend-driven gameplay, **Spine** animations, **Effekseer** effects, and **Redux** state management while optimizing rendering, asset loading, and overall game performance.

Technology Environment : Phaser 3, TypeScript, React, Spine, Effekseer, HTML5 Canvas, WebGL, Git.

3. **In-House IP** : LBVR Co-op Shooting Game(Unreal Engine 5): Contributed to a two-player multiplayer Location Based VR shooting game by developing replicated gameplay systems, including a custom VR inventory, AI behaviors, and interactive environments. Implemented in-world VR UI, dynamic turret gameplay, and physics-driven animation systems using Animation Blueprints, ragdolls, cloth simulation, and physics constraints while optimizing multiplayer synchronization, gameplay, and VR performance.

Technology Environment: Unreal Engine 5.3, Meta Quest Developer Hub, Steam VR, Tortoise SVN.

4. **In-House IP** : VR Mini Games(UE 5) : Developed multiple immersive VR mini-games and exploration experiences using Unreal Engine 5, implementing VR input handling, player interaction systems, hand animation Blueprints, and rover-based exploration mechanics. Collaborated with designers to create intuitive VR gameplay while improving stability, performance, and overall user experience through debugging and playtesting.

Technology Environment : Unreal Engine 5.2, Meta Quest Developer Hub, Steam VR, Tortoise SVN

EDUCATION

S. No.	Qualification	School/ Institute	Board / University	Year of passing	Percentage/ CGPA
1.	B. Tech.	THDC IHET, Tehri	Uttarakhand Technical University	2023	74%
2.	HSC (12 th)	Rainbow English Sr. Sec. School, New Delhi.	CBSE	2019	76.4%
3.	SSC (10 th)	Dr S. R. S. Mission School, New Delhi.	CBSE	2017	8.2 CGPA

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge.
